

Data Engineering on Google Cloud Platform

Data Engineering Learning Path

1. Data lakes and data warehouses
2. Building batch data pipelines
3. Streaming systems and performance 
4. Analytics and AI

Building resilient streaming systems

1. Processing streaming data
2. Cloud Pub/Sub
3. Cloud Dataflow streaming features
4. BigQuery streaming features
5. Cloud Bigtable
6. Advanced BigQuery functionality
7. Summary
